Subject: RE: General conclusion

That about sums it up.
Interestingly, from the list provided by Charlie, no parents have said they paid with a check.

Subject: General conclusion

Here is what I have put at this time for general conclusion points:

Coach Bowyer has stated that he knows for a fact the tri-fold of money/checks will never be found.

Coach Bowyer stated that he knows he gave Lynda Gardner the tri-fold of money/checks and she must have lost it or accidentally thrown it away after he either gave it to her or he may have possibly placed it on her desk.

Coach Bowyer admits that he did not keep record of checks or money received by students nor did he write receipts for the money collected for the User Fees. (He refers to a deposit sheet in an email on 4/27/15 stating it shows a student checked off as paid but never produced this deposit sheet he refers to in the email.)

Lynda Gardner - THS Athletic Secretary does not have any record of funds being turned into to her for deposit and record management, however she has emails from Coach Bowyer stating that all User Fees were collected by his baseball players. She states that the only time he came to her with a Baseball User Fee deposit was for Winchester and she directed him to the InfoPath deposit sheet.

Coach Bowyer stated he shut down and did nothing regarding finding the money/checks because he did not know what to do.

There have been concerns regarding Coach Bowyer and his record keeping. (Booster Club and lost exam key)

Coach Bowyer admits to having difficulty with paperwork and not being organized calling himself a computer "dinosaur".

Coach Bowyer admits to not having told the truth regarding the collection of Baseball User Fees when he stated twice in emails that all of his players have paid.

Coach Bower admits to not following the directive from Coach Herrmann regarding contacting the parents to determine how they paid their Baseball User Fees in May.

Coach Bowyer stated that he does not have problems in the regular classroom because he does all of his grading on completion and provided an example that if he asks students to write that he just skims the writing looking for key words.
